Madeleine Fogarty a passionate researcher, Gestalt Therapist, trainer and supervisor, has travelled the world and interviewed many renown Gestalt Therapists to investigate the question: `what is Gestalt Therapy?` Her interactive workshop focuses on the clinical practice of Gestalt Therapy and allows participants to engage in a supervision experience.

In her workshop Madeleine will introduce participants to the Gestalt Therapy Fidelity Scale (GTFS) as a way of defining what it is that Gestalt Therapists do in their clinical practice and as a tool for supervision. This workshop is an opportunity for participants to focus on their own clinical work and refresh their understanding of Gestalt Therapy principles. Madeleine will also introduce video sessions as a mode of supervision and stimulate engagement and discussion. This workshop will provide a forum for peer supervision and peer support.

Participant Outcomes

• Knowledge of the Gestalt Therapy Fidelity Scale (GTFS) and how it can be used to enhance clinical practice
• Refreshed understanding of Gestalt Therapy principles and what Gestalt Therapists do in their practice
• Review of participants’ own clinical practice, its strength and growing edges
• Understanding of video sessions as a mode of supervision
• Peer supervision and support

Who is the workshop for?

• The workshop is designed for clinicians who may or may not be trained in Gestalt therapy and who are interested in learning more about Gestalt Therapy and how it may enhance and support their clinical practice.
• Students are welcome

About your presenter

Madeleine Fogarty lives (with her large and beautiful family) in Melbourne, Australia where she has been working as a psychotherapist and supervisor in private practice for the past 17 years. A regular contributor to Gestalt Journals and conferences, Madeleine is completing her Doctorate in Psychology at Swinburne University of Technology on the development and validation of the Gestalt Therapy Fidelity Scale. Madeleine also runs supervision and training on the use of the GTFS for clinical practice. Madeleine is the Research chair for GANZ, is on the psychotherapy leadership group for PACFA, on the committee for the International Gestalt Research Group, a member of the AAGT and is a scientific board member for the EAGT.
